

# University of Alaska Transcript Study<sup>1</sup>

## Introduction

The number of students in need of developmental coursework<sup>2</sup> arriving at all University of Alaska campuses has been unacceptably high for many years. The persistence of these students within the university has likewise been unacceptably low. This study examined the 10-year historical rate of required developmental coursework for all schools in the state with ten years of data from which ten or more 2015 graduates enrolled at all campuses of the University in Fall 2015<sup>3</sup>:

A sub-group of schools with developmental coursework rates above 71% was evaluated by examining ten years of high school transcripts for every student to determine:

1. the average GPA for all students,
2. the final math and English classes taken in high school,
3. the average grades earned for those final math and English classes,
4. the percentage of students successfully completing college preparatory math and English courses.

## All schools in study

Total students from the study group: 15,016

Rate of students requiring developmental course work: 60.8%

## Study sub-group

Number of schools with a 71% or greater number of students requiring developmental coursework: 5

Total students attending UA from study sub-group: 1,550

Average high school cumulative GPA<sup>4</sup>: 3.16

Rate of students requiring developmental coursework: 74.1%

Rate of students requiring developmental coursework in English: 39.5%

Rate of students requiring developmental coursework in math: 69.1%

Rate of students successfully completing algebra 2 or higher in high school<sup>5</sup>: 70.4%

Rate of students successfully completing English 4 or equivalent in high school<sup>6</sup>: see note 6

## Why is this important?

- Students are passing college preparatory courses in high school with high grades, then repeating those classes when they arrive at the university.
- The state is spending millions of dollars annually for students to take classes in high school and then paying again when the courses must be repeated at the university.
- Students and their families are spending millions of dollars in additional college costs because their students are arriving at the university under prepared.

## What can we do to improve the situation?

1. Develop joint long term goals and milestones for improvement within K12 and the university.
2. Align the academic curriculum between K12 and the university.
3. Implement a quality control system that provides useful feedback for all.

ANSEP is working productively with the following school districts to improve the situation: Anchorage, Mat-Su Borough, Bering Strait, Kashunamiut, Lower Kuskokwim, Lower Yukon, Northwest Arctic Borough, St. Mary's, and the Kenai Peninsula Borough.

<sup>1</sup> All data compiled from University of Alaska records by the University of Alaska Anchorage Office of Institutional Research and the Alaska Native Science & Engineering Program (ANSEP).

<sup>2</sup> Developmental coursework is considered intermediate algebra or below and English below written communication

<sup>3</sup> 37 high schools were included in the study.

<sup>4</sup> 1,550 transcripts were evaluated for GPA and student performance. 64 transcripts or 4.06% of the sub-group data set are unavailable.

<sup>5</sup> Students who successfully complete algebra 2 or higher should require no developmental coursework upon arrival at the university.

<sup>6</sup> Successful completions of English 4 or equivalent should mean no developmental coursework required at the University. Due to a lack of consistent English curriculum between schools, it is impossible to determine this number for the study sub-group.

## UA Transcript Study

UA First-time Freshman<sup>1</sup> with Developmental Education Courses by High School

Schools with 10 or more graduates in 2015 enrolling at the University of Alaska

Students taking at least one developmental course in math or English<sup>2</sup>

Data for Fall 2006 through Fall 2015

	Rate of developmental coursework	Average High School GPA	
<b>Bartlett High School</b>	71.0%		
<b>Bethel Regional High School</b>	61.7%		
<b>Chugiak High School</b>	51.7%		
<b>Colony High School</b>	57.0%		
<b>Dillingham High School</b>	45.8%		
<b>Dimond High School</b>	59.3%		<b>study group</b>
<b>Eagle River High School</b>	48.9%		15,016 total students
<b>East Anchorage High School</b>	69.2%		9,124 total developmental students
<b>Eielson High School</b>	45.1%		60.8% total developmental percentage
<b>Frontier Charter School</b>	55.4%		
<b>Galena Interior Learning Acad</b>	77.6%	3.44	<b>study subgroup</b>
<b>GED (Alaska)</b>	72.7%		1,550 total students
<b>Grace Christian School</b>	47.9%		1,150 total developmental students
<b>Homer High School</b>	55.0%		74.2% total developmental percentage
<b>Houston High School</b>	61.0%		
<b>Juneau-Douglas High School</b>	75.1%	3.05	
<b>Kenai Central High School</b>	56.7%		
<b>Ketchikan High School</b>	71.5%	3.21	
<b>Kodiak High School</b>	74.0%	3.26
